Allowable Subject Matter

Claims 22-40 are allowed, corresponding renumbered claims are: 1-19.

The following is an examiner's statement of reasons for allowance:

For inverting a point X on a distorted surface in a detail-in-context presentation for display on a display screen, comprising the steps of: (a) locating a first approximation point for an inversion of the point X, wherein the first approximation point is on an undistorted surface; and, (b) obtaining second point by displacing the first approximation point onto the distorted surface by applying a distortion function, and calculating a magnitude of the difference between the second point and X and the second point determines whether the first approximation point is acceptable for the inversion of the point X by comparing the magnitude of the difference to a tolerance; and displaying the first approximation point on the display screen if the first approximation point is acceptable for the inversion of the point X.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
